

# Expand your planetarium's capacity. Get Uniview Drop-In™.

Uniview Drop-In is a quick and easy installation package of servers and software – a cost effective way to get access to the Uniview planetarium software and the upcoming release of Uniview 3.0. The solution is developed for any display system comprised of a two-channel 4K projector solution. Our engineers manage the server installation on-site – using your existing video infrastructure – and you are good to go!

## Why get Uniview Drop-In?

### Uniview Access

Uniview Drop-In is an easy, fast, and cost effective way to get access to Uniview - a modern planetarium software with high-end presentation and production tools, the latest visualization of real-time astronomy and neuroscience, domecasting, media playback, and much more.

### Lifetime & Reliability

With the extra server cluster you minimize downtime in the event of computer failure, and you prolong the life time of your existing display system. Everything is factory installed, configured and tested before the on-site installation, resulting in a fast, easy, and extremely reliable system launch.
